

SOIL-SENTRY

Soil Sentry

The Soil Sentry is an all hydraulic, lightweight, high-torque drill unit designed for a range of drilling operations. The Soil Sentry incorporates a large hollow bore spindle (3-5/8 in.) and the 4 inch Ackermatic Chuck is available as an option.

The Soil Sentry can be mounted on a trailer or light duty truck. For operation in remote areas, high flotation and rough terrain options are available.

Ease of operation, ease of maintenance, all hydraulic functions, lightweight and rugged operational features are built into the Soil Sentry to meet demanding job conditions at economical costs.

Field tests under "on site" conditions have shown the Soil Sentry is a dependable, economical choice for versatile drilling operations.

Features:

- 6 ft. Feed Stroke
- 45 Degree Hole Angle Capability
- 3-5/8" Spindle Bore
- 4 Speed Drill Head
- Quick Disconnect Adapter
- Maximum Torque — 3,200 ft. lbs.
